

Kartalin 2-step shampoo

Method of application

KartalinCream.com

Step #1 is dry shampoo. Effectively and carefully cleans hair and scalp from Kartalin cream residues.

The components contained in the composition have anti-inflammatory and exfoliating effects, help restore the skin, increase the regenerative and barrier functions of the skin and prevent the feeling of dryness and irritation.

Step #2 is a wet shampoo. The classic way of using shampoo ensures gentle cleansing of the hair and scalp.

The ingredients in this shampoo help restore the natural balance of moisture and nutrients, leaving hair stronger and shinier.

After using Kartalin cream, Kartalin A+ (or other oil-based products, including oil masks), you should start cleansing your scalp and hair.

Step 1. Dry shampoo.

1) Do not wet your hair with water. The hair should be dry, with only residue of Kartalin cream or other oil-based product

Distribute the shampoo evenly over your head (as you would with your normal hair washing method).

2) Rub the shampoo over your scalp and hair. After this, you should leave the shampoo on your head for 3-4 minutes. Then rinse Step No. 1 shampoo with warm water.

Step 2: Wet shampoo method.

After treating your scalp and hair with Step No. 1 shampoo and rinsed thoroughly, apply KARTALIN Step 2 shampoo to damp hair, lightly lather, rub gently over your hair and hold for 1-2 minutes. and then rinse your hair with warm water.

The shampoo contains natural ingredients that help strengthen and nourish the hair, and with constant use, restores the hair structure.

The inclusion of lactic acid in shampoo provides an exfoliating effect, promotes the regeneration and renewal of skin cells.

Allantoin contained in the shampoo helps to solve the problem of dandruff, nourishes the hair root system, moisturizes the scalp, protects the hair from the effects of negative environmental factors, and also fights inflammation and destroys harmful bacteria.

Contains no toxins, hormones or dyes.

More than 90% of the ingredients are of natural origin.

It has no side effects or addictive effects.

No contraindications have been identified; individual intolerance to the components is possible
